

ENABLING BUSINESS SUCCESS THROUGH TECHNOLOGY

STEM SPEAKER SERIES

Thursday, November 29th

1:30p.m.-2:45p.m.

Academic Building 3-447

SPEAKERS

Dylan O'Mahony and

Craig Horgan

Bose Corporation

Information technology (IT) has always been a key enabler of business success. Since the early days of mainframe systems, businesses have used IT to automate critical business processes, like making and selling products and paying employees. Today, technology is advancing exponentially and IT professionals are working with their business partners to figure out how their companies can:

- Keep up with what is possible with technology
- Make sure what they do has business impact
- Implement new technology quickly and effectively
